Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

Database : SwissProt_40:*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

*A constitutive nucleolar protein identified as a member of nucleoplasmin family.";

EMBO J. 6:1881-1890(1987).

-I- FUNCTION: ASSOCIATED WITH NUCLEOLAR RIBONUCLEOPROTEIN ST AND BIND SINGLE-STRANDED NUCLEIC ACIDS. IT MAY FUNCTION ASSEMBLY AND/OR TRANSPORT OF RIBOSOME (BY SIMILARITY).

-I- SUBCELLULAR LOCATION: NUCLEAR; NUCLEOLAR.
                                                                                                                                                                                                                                                                                                                 DOMAIN

-i- FUNCTION: NUCLEOLIN IS THE MAJOR NUCLEOLAR PROTEIN OF GROWING EUKARYOTIC CELLS. IT IS FOUND ASSOCIATED WITH INTRANUCLEOLAR CHROMATIN AND PRERIBOSOMAL PARTICLES. IT INDUCES CHROMATIN DECONDENSATION BY BINDING TO HISTONE H1. IT IS THOUGHT TO PLADECONDENSATION BY BINDING TO HISTONE H1. IT IS THOUGHT TO PLADECONDENSATION BY BINDING TO HISTONE H1.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        "Nucleolin, the major nucleolar protein of growing eukaryotic cel an unusual protein structure revealed by the nucleotide sequence. Chem. 266:14703-14708(1991).

FUNCTION: NUCLEOLIN IS THE MAJOR NUCLEOLAR PROTEIN OF GROWI EUKARYOTIC CELLS. IT IS FOUND ASSOCIATED WITH INTRANUCLEOLA CHOMATIN AND PREBIBOSOMAL PARTICLES. IT INDUCES CHROMATIN DECONDENSATION BY BINDING TO HISTONE H1. IT IS THOUGHT TO PROLE IN PRE-FRNA TRANSCRIPTION AND TRIBOSOME ASSEMBLY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     SIMILARITY: CONTAINS 4 RNA RECOGNITION MOTIFS (RRM).

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Dictyostelium discoideum (Slime mold).

PUTATIVE HISTONE DEACETYLASE HD2C (AT5G03740/F17C15_160).
Arabidopsis thaliana (Mouse-ear cress).
Eukaryota; Viridiplantae; Streptophyta; Embryophyta; Tracheophyta;
Spermatophyta; Magnoliophyta; eudicotyledons; core eudicots; Roside
eurosids II; Brassicales; Brassicaceae; Arabidopsis.
